

# 75 Ohm TNC Male Crimp Right Angle for RG59 Cable

## Features

- Widely utilized for equipment cabling and antenna interfaces used in the cellular/mobile communication industry
- Nickel plated clamp nut and body provides optimum resistance to corrosion
- Gold plated contact pin reduces signal loss
- Crimp style attachment results in robust connector to cable attachment
- Threaded style coupling coaxial connector

**These TNC Right Angle male connectors have been specifically designed for a crimp style attachment to RG type cable. The connector body and crimp sleeve are machined and nickel plated for superior corrosion resistance and durability. Gold plating is utilized on the center pin for low contact resistance. This precision manufactured connector is available from stock for immediate delivery.**

## Details

L-com Item #	BAC709
Manufacturer	L-com
UPC # (More)	822335001589
RoHS Status	<a href="#">RoHS Compliant</a> 

## Applications

- Coaxial cable assembly
- Coaxial cable repair
- Premise wiring
- WLAN
