FEATURES

Accessories

Standard Horizon supplies the HX370S with a 1400 mAh Nickel Metal Hydride battery that will last over 18 hours (5/5/90 duty cycle) when transmitting at 5W. Also included is a waterproof alkaline battery tray, 12VDC Charger, 110VAC charger and a desk top drop-in cradle to charge the radio on shore or on your boat. Additionally, an easy to see battery life indicator on the LCD warns you when the battery needs recharging.

The HX370S is capable of using optional speaker microphones, headset, and voice scrambler for those that want secure communications.

Features you expect and unique functions

The HX370S has the capability to be programmed to scan any number of channels with other without priority to channel 16 also includes Ch16 Dual Watch and NOAA Weather alert. The PRESET key allows you to easy recall 8 of your most used channels. An oversized LCD has channel names to inform you of the use of each selected channel. The high intensity strobe light emits the internationally recognized SOS signal that can be seen over 1 mile away at night... another Standard Horizon first!

VHF Marine and Dealer Programmable LMR channels

The HX370S is factory programmed with all USA, Canadian and International and NOAA Weather channels. It also has the capability to be programmed 40 Land Mobile Radio (137-174MHz) channels with CTCSS or DCS signaling by a Standard Horizon dealer. These channels do require the appropriate FCC license.

It's built better so backed better

Because the HX370S is built better, it's back better. If your Standard Horizon HX370S ever fails for any reason including water damage during normal use in the first three years, STANDARD HORIZON will repair or replace it free, without hassle or charges...period! If it fails thereafter in normal use it for the life time of the product it is covered by Standard Horizon's Lifetime Flat Rate Service Program.
