

Air/Gas Probe

Model 8716

- Temperature Range: 570 °F (300 °C)
- Sensor Type: Type-K
- Applications: Hoods, ducts and vents
- Air/Gas Probe
- 3-second time constant
- 4" long handle

For measuring atmospheres in hoods, ducts, and vents. A perforated-style shield protects the thermocouple tip from radiated temperature change in order to provide more accurate readings. The 8-1/2" sheath is constructed of 304 stainless steel. The probe is supplied with a 3-ft straight cord.
